NAWCA GRANT AMOUNT TOTAL PARTNER CONTRIBUTION NUMBER OF PROJECTS TOTAL ACRES

Iowa currently has 49 NAWCA projects either completed or underway. These projects have conserved a total of 101,256 acres of wildlife habitat. NAWCA funding of more than \$27.8 million stimulated partner contributions of over \$97.3 million. These figures do not include multi-state projects.

UPPER IOWA PRAIRIE POTHOLE IV

This proposal represents the fourth phase of an ongoing partnership aimed at protecting, restoring and enhancing more than 1,370 acres of critical wetland and migratory bird habitat throughout Iowa's northern Prairie Pothole Region (PPR). This area is considered a geographic priority wetlands area and region of continental significance to North American ducks, geese and swans as part of the North American Waterfowl Management Plan.

This proposal will build on the momentum developed through previous Phases of the project and confront the continued loss of wetland and grassland habitat. Diverse habitat types will be restored, enhanced and protected as a result of this project, including wetlands and native tall grass prairie and oak savannas communities, which will help compensate for the major loss of seasonal, temporary and semi- permanent wetlands. Completed work will provide critical breeding, foraging and migration habitat for 10 "high priority" (northern pintail, mallard, American black duck, lesser and greater scaup) and "other priority" (wood duck, redhead, canvasback, ring-necked duck, American wigeon) waterfowl species and provide direct and indirect benefits to several other NAWCA priority bird species.
