NUMBER OF PROJECTS

TOTAL ACRES

Kansas currently has 22 NAWCA projects either completed or underway. These projects have conserved a total of 91,480 acres of wildlife habitat. NAWCA funding of more than \$11.6 million stimulated partner contributions of over \$22.5 million. These figures do not include multi-state projects.

KANSAS PRAIRIE WETLANDS II

This project will benefit critical habitat by acquiring, restoring and enhancing 5,091 acres of the Quivira wetland complex. The wetlands in this project provide important migration stopover habitat for waterfowl, shorebirds, wading birds and other migratory birds, being utilized by an estimated 45% of the shorebirds in the Western Hemisphere during spring migration. This includes 90% of the white-rumped, Baird's, and stilt sandpipers; long-billed dowitchers and Wilson's phalaropes. These projects will both restore wetlands and provide a unique opportunity to convert poor quality cropland into wetland and upland habitat that can be enjoyed by the public. Other species benefitted include least terns, piping plovers, mallards, northern pintails, wood ducks, king rails, and American bitterns.
